**This page provides summary descriptions of our core products that may be downloaded. Each product is full featured and is fully operational for the trial period.**

**We also provide Case Studies of various scenarios.**

To purchase a license and receive the unlock code for any of our products please call us at (613) 9762 6244.

Note: You will need to have the product demo running or have the computer key generated by the product available when you call (see registration Tec. note).

## ScadaPhone ©

Product	Version	File Size
<a href="#">ScadaPhone© Install Program</a>	4.4.8.7	7100 KB

Includes sample project file. Full Voice Library. Sample Excel® Server. Help File & Tutorial.

Please read Tec. Note on [Serial Port Setup](#).

ScadaPhone© is a voice alarm and remote telephone SCADA access software product. As a 32 bit Windows compliant product, it runs on Windows 95, 98, Windows NT, and Windows 2000 .

Note: The software uses a MultiTech Voice/Fax modem, however testing and development may be done without the modem by using the PC sound card.
